

# BOWMANVILLE QUARRY

LOCATION: MUNICIPALITY OF CLARINGTON  
 CLIENT: ST. MARY'S CEMENT  
 TYPE: AGGREGATE APPROVALS  
 DATE: 2006

Following a two year approval process, St. Marys Cement Inc. secured approvals to deepen its Bowmanville Quarry by another 127m (417ft.) which will provide additional reserves to supply its cement plant. The project represents the wise use and management of aggregate resources by utilizing an existing approved area for extraction at a site that has direct access to Hwy 401, shipping and rail facilities.

MHBC provided planning and project management services and completed the necessary site plan amendments.
