

Urban Design

LOCATION: WOODSTOCK, ON
CLIENT: CITY OF WOODSTOCK
TYPE: INDUSTRIAL URBAN DESIGN GUIDELINES
DATE: 2006 - 2007

MHBC recently completed a comprehensive Design Study for a large-scale industrial park surrounding the new Toyota facility. This study coordinated environmental, engineering, transportation and planning and design for the site. MHBC was contracted to complete the planning and design component of the Secondary Plan, which included the creation of the Industrial Design Guidelines. This project involved a significant public consultation and facilitation component. MHBC prepared presentations at multiple public meetings and worked closely with County and City staff throughout this project.
