

GEORGIAN COLLEGE

LOCATION: COLLINGWOOD, ON
 CLIENT: GEORGIAN COLLEGE
 TYPE: URBAN DESIGN ANALYSIS
 DATE: 2010

MHBC was retained to assist Georgian College with the potential expansion of their academic facilities with a new Collingwood Campus in the Town of Collingwood. To assist Georgian College, MHBC undertook a scoped Urban Design analysis in order to assess what elements are necessary to achieve a Concept Plan that is dedicated to providing quality education and training for Georgian Campus over the long term. The analysis resulted in a design framework that provided guidance in the final design for the campus and development applications for the implementation of this new satellite campus for Georgian College.
