

MILTON QUARRY EXPANSION

LOCATION: MILTON, ON
CLIENT: DUFFERIN AGGREGATES
TYPE: AGGREGATE APPROVALS AND REHABILITATION
DATE: 2007

Dufferin Aggregates received final approval from Ontario's Cabinet to expand its Milton Quarry by 83 hectares. The approval represents a new era in resource management and environmental innovation for quarrying in Ontario. The strength of Dufferin's rehabilitation efforts were a major contributing factor to the success of this project.

The application includes a state of the art mitigation and monitoring plan to protect surrounding natural heritage features. Over 405 hectares (1,000 acres) of natural and rehabilitated land will be transferred to public ownership thereby, enhancing the ecological integrity of the area, assisting the Conservation Authority in managing water resources and creating one of the largest contiguous environmental areas in public ownership within the Greater Toronto Area.
