

MOUNTAIN LAKE QUARRY

LOCATION: GALWAY-CAVENDISH HARVEY TOWNSHIP
CLIENT: FLOYD PRESTON LIMITED
TYPE: AGGREGATE APPROVALS
DATE: 2000

This is an example of a smaller project completed in an efficient and timely manner. The application was for an aggregate permit on crown land in 'cottage country' north of Buckhorn. The proposed quarry included both granite and limestone bedrock, for road aggregates and building stone respectively. Close contact and a good working relationship with MNR staff facilitated MHBC in securing approval of the permit some 6 months after the applications being made. Since receiving approval, the granite quarry is listed on MTO's Designated Sources for Material (DSM) list for DFC asphalt aggregates.
