

# RIVERWOOD SUBDIVISION

LOCATION: RIVERWOOD SUBDIVISION, KITCHENER  
CLIENT: HALLMAN CONSTRUCTION  
TYPE: SUBDIVISION DEVELOPMENT  
DATE: 2007-2009

MHBC worked closely with the Developer and the City of Kitchener to create a feature neighbourhood within the City of Kitchener. This community is composed of over 700 units of varying types ranging from single detached to townhouse units. MHBC was involved in the initial concept designs, marketing materials, overall subdivision master plan, municipal coordination and approvals, working drawing and specification preparation, tendering and construction contract administration for this project.

Highlights of this site include design integration with a neighbourhood park, existing woodlots and trails, the development of new trail designs, stormwater pond design, the design of community entry features, intermediate community markers, and planted feature cul-de-sac islands.
