

SHIPYARDS

LOCATION: COLLINGWOOD, ON
 CLIENT: FRAM BUILDING GROUP
 TYPE: BROWNFIELD
 DATE: 2003 - 2009
 ARCHITECT: THE MBTW GROUP / WATCHORN ARCHITECT

Collingwood was traditionally a shipbuilding town. The main street of downtown Collingwood terminates at Georgian Bay, where the shipbuilding industry sustained the Town for generations. When the shipbuilding industry left the Town, Collingwood was left with a brownfield site at a critical junction in the urban fabric of their downtown.

Since 2003, MHBC has been working with the land owner and developer to create a residential and commercial development which will extend the downtown to the water's edge.
