

TRAIL HEAD MASTER PLAN

LOCATION: MILTON QUARRY, MILTON, ON
 CLIENT: DUFFERIN AGGREGATES
 TYPE: RECREATIONAL TRAIL DEVELOPMENT
 DATE: 2004

The trail head master plan was developed by MHBC to illustrate a concept for the future quarry restoration to the local conservation authority.

Shown here is a portion of one of three concepts that were developed and refined for presentation to Conservation Halton. The plan illustrates in concept the main entrance areas for the future park and interpretive areas which will emerge once the quarry is no longer in operation.

Future plans for the site include a park, complete with internal trail systems connecting to the Bruce Trail, picnic areas with public facilities, and a manmade lake & beach.
