ABOUT URBAN DESIGN @ MHBC

MHBC understands that urban design can help to connect people with places, balance the protection of the environment with emerging built form, and influence the development process to achieve development that promotes a sense of place and local identity within a community. Our firm deploys an interactive design process that includes visioning, community outreach, team facilitation, team capacity building, and graphical representation to achieve design solutions that are reflective, responsive and respectful of the local community context. Our design approach is collaborative, working with landowners, municipalities, stakeholders and the public to achieve design that balances input from all, allowing for community buy-in and personal ownership of the final design.
